How to Provide a Clean Catch Urine Sample

To get the best possible test results, please follow these instructions carefully.

1. For females, wear a cloth or paper towel to cover the urinary opening when opening the towelettes.
2. Wash your hands with soap and water, then rinse and dry them.
3. Open the wipe packet and unfold the wipe.
4. Use 2 fingers to open the skin folds where you urinate, then wipe the area.
5. Stand in a squatting position.
6. Open the towelettes and place them on a clean surface.
7. Follow the midstream clean catch directions below.
8. If instructed, use a cloth or paper towel to cover the urinary opening when collecting the sample.
9. Dry your hands thoroughly after handling the sample.

For males:

1. Wash and dry your hands thoroughly.
2. Remove underclothing far enough to adequately clean and collect the urine specimen.
3. If not circumcised, retract the foreskin and use all antiseptic pads provided.
4. Open the towelettes and place them on a clean surface.
5. Follow the midstream clean catch directions below.
6. If instructed, use a cloth or paper towel to cover the urinary opening when collecting the sample.
7. Dry your hands thoroughly after handling the sample.

For all:

1. Follow midstream clean catch directions below.
2. If instructed, use a cloth or paper towel to cover the urinary opening when collecting the sample.
3. Dry your hands thoroughly after handling the sample.

Midstream Clean Catch Directions:

1. Stand in a squatting position.
2. Open the towelettes and place them on a clean surface.
3. Follow the instructions provided by the healthcare worker.
4. Collect the sample into the BD vacutainer urine collection cup.
5. Replace the blue cap onto the cup.
6. Return the sample to the healthcare worker.

Please note: The instructions provided are for general guidance and may vary depending on the healthcare provider's instructions.
